PRESENTING OUR LATEST ACCOMPLISHMENT:

The Location: **Dean & DeLuca**, a fabulous gourmet store in Napa

The Project: **Redo an espresso bar** with the aesthetics from their flagship Soho store in New York City

The Challenge: **Complete the entire project in just 4 weeks while the store remains open for business**

How'd we do? Challenge accomplished! Our crews worked day and night (literally) to make it happen and the results speak for themselves (*see photos*). And, with the temporary coffee bar we set up during construction, no customer was ever inconvenienced! 

Here's what we did:

- Granite countertops at espresso machine, customer service area, pastry table
- Glass/granite pastry display table
- Stainless steel clad walls and prep/service back counter
- Stainless steel shelves with subway-set tiles on walls
- Custom cabinetry front and back by Five Star Fixtures, our in-house cabinet shop
- Quarry tile flooring
- Equipment: Self-serve refrigerator, tea brewer, microwave, and toasters
